

## Need to Know for Our Product, the BOOK:

Do we have the right to capture and cage animals? Yes, when... or No, never!

### IF YOU ARE RESEARCHING SPECIFIC SPECIES:

Who captures the animal and why do they capture them in the first place?

How do they capture the animal?

What happens physically and emotionally to an animal when it is captured and caged?

How they are typically treated in captivity?

Has the rate of capture over the last ten years increased or decreased?

Pros and cons of capturing and why one outweighs the other?

### IF YOU ARE RESEARCHING:

Animal instinct in the wild vs. captivity?

Does the treatment of animals in captivity alter the animals instincts?

If so, how can the environment change so that it is closer to the animals' natural habitat? And if the environment cannot be altered, should they be captured at all?
